SUMMARY

Learning Full-Stack Developer transitioning from the food industry, bringing strong problem-solving, collaboration, and communication skills. Eager to develop expertise in front-end development.

SKILLS

Front-End: ReactJS, Typescript, TailwindCSS, HTML, CSS, JavaScript, Python

Back-End: NodeJS, MongoDB, MySQL, Prisma ORM, Postgresql, Express

PROJECTS

AirQuality

- Developed an Air Quality Checker web application using ReactJS and REST API. Allows users to view real-time air quality data for selected cities, including a forecast. Implemented local storage functionality to enable users to bookmark up to five preferred locations for quick access.

Beauty Clinic Landing Page (developing)

- Designed and developed a responsive landing page for a beauty clinic in Bangkok, showcasing their services and team expertise.

Personal FullStack Project (developing)

- Develop a Calendar web application which can Share with other, and features to note diaries and Mood tracker. Using React TypeScript, NodeJS Express, TailwindCSS, PrismaORM and PostgreSQL for databases. This project will going to be a final fullstack project to conclude the fullstack bootcamp program.
